Professor Francesco Paolo Alberico Italy

iFine Eye Lift Treatments

After 16 month post 8 sessions
Dr. Isabelle Rousseaux France

Body Tightening & Contouring Treatments

After 2 sessions
Dr. Thierry Leva

How are ENDYMED treatments different from other RF treatment option?

Most RF treatment options available today are based on older, traditional radiofrequency technologies. ENDYMED's innovative 3DEEP technology is the only technology that uses 6 RF generators that work together to push the energy deep into the dermis, where collagen is produced, for the most effective collagen remodeling and facial and body tightening.

How many treatments will i need?

Most patients receive a series of 6 - 8 Treatments are usually performed once a week, and each treatment area typically takes 15 - 20 minutes for facial. 20 - 30 minutes for body. And for FSR a series of 3 fractional treatments, once a months for 3 months.

Are the treatments safe?

ENDYMED's 3DEEP technology has been clinical validated and proven safe by over 40 independent clinical studies, published in international industry journals. Our treatment platforms have been designed with the most sophisticated safety features to ensure that you receive the most comfortable and effective treatment experience.

Is there any downtime after treatments?

ENDYMED's facial and neck tightening treatments have no downtime. There may be a slight pinkish blush to the skin after treatments that typically fades after 1 - 2 hours. You can absolutely return to your daily routine immediately after treatments. And typically, RF fractional treatments have minimal downtime. You may have very small crusting that will disappear after 3 - 5 days.

What should I expect from my ENDYMED treatments?

You should expect a comfortable and safe treatment experience. As your treatments progress, you will experience increasingly visible improvements to your skin, improvements that will continue for 3 months after the completion of your last treatment.

ENDYMED™ | PRO

Superior RF Multi-Treatment Platform

The EndyMed PRO, powered by unique, FDA cleared 3DEEP RF technology, offers innovative and effective aesthetic solutions for non-surgical lifting, tightening, contouring, skin resurfacing and RF Microneedling for the face, neck and body.

The ENDYMED treatment experience offers you:

- Completely safe and comfortable treatments
- Clinically proven effective results
- Suitable for all skin types
- No downtime
- Both immediate and long term superior results
- Fast treatment times

ENDYMED[™]
3DEEP SKIN SCIENCE

FACE

Restore your collagen naturally with a non-surgical face lift by ENDYMED

Get tighter, smoother, younger looking skin with ENDYMED's clinically proven anti-aging treatments.

How does it work?

EndyMed's 3DEEP facial and neck treatments use multiple RF generators that deliver deep and focused RF energy deep into the dermis, stimulating the production of new and strong collagen and elastin fibers, which results in tighter, smoother skin.

3DEEP ensures that the RF energy is delivered into the dermis without affecting the epidermis, eliminating the risk of skin damage and the need to cool the skin.

EndyMed's focused RF treatments offer the best solution for the most sought-after aesthetic treatments:

- Eye lifting and tightening
- Skin tightening
- Wrinkle reduction
- Facial rejuvenation
- V-Shape tightening of the jawline/jowls and under the chin
- Neck tightening

BODY

Body Sculpting at it's Best - Get the results you want without surgery or downtime

ENDYMED provides the most in demand, superior body tightening, sculpting and cellulite reduction treatments, offering very high patients satisfaction.

How does it work?

ENDYMED's Contour treatments combine the power of focused 3DEEP energy with the benefits of vacuum tissue lifting to provide the ultimate in cellulite reduction and body tightening and contouring treatments.

The Contour's unique tissue lifting vacuum effect doubles the energy delivery and heating of the treatment area, reaching higher treatment temperatures to melt the fat cells under the tissue, improving the appearance of cellulite, sculpting and defining the body.

ENDYMED's focused RF treatments offer the perfect solution for the most sought-after body treatments :

- Cellulite reduction with Contour treatments
- Body tightening and contouring
- Wrinkle reduction
- Circumference reduction
- Arm tightening and skin sagging reduction
