

# AHA/Retinol Peel System

For Professional Use Only

Contains One Peel

# TIZO®

## PHOTOCEUTICAL®

## Product Description

### TIZO® Photoceutical® AHA/Retinol Peel System

is a twofold superficial peel specifically designed to address the visible signs of pigmentary changes, photo-aging, photodamage, and acne while achieving a more even skin tone and texture.

The initial peel combines Mandelic, Lactic, and Phytic Acids (all AHAs) with three brightening enhancers. After neutralization, this is followed by an application of Retinol Reversal, a proprietary blend of 10% Retinol delivered through time-release TIZO® Skin Firm Technology®.

## Kit Contains the following materials for a single peel:

- 1 Rapid Exfoliator AHA peel vial
- 1 Neutralizer Mist bottle (1 oz.)
- 5 g jar 10% Retinol Reversal (Time-Release)

%	Lactic Acid %	Mandelic Acid %	pH	Medical or Aesthetician	Phytic Acid	Niacinamide	Licorice Extract	Arbutin	Botanical Extract
30%	15%	15%	1.8	Medical	1.0%	0%	✓	✓	✓

## Directions For Professional Use

See complete directions in package insert.

*Not intended for home or consumer use.*

*To be used only by a licensed professional.*

- Cleanse and prepare the skin
- Apply Rapid Exfoliator AHA Peel Solution evenly to skin using a fan brush or applicator
- AHA peel may be left on the skin up to 5 minutes, then must be neutralized by spraying with TIZO® Neutralizer Mist
- Gently rinse and cleanse
- Apply an even layer of 10% Retinol Reversal
- Once the Retinol Reversal has dried, apply a general mineral sunscreen
- The patient may be sent home with the retinol in place and can wash it off after 8 hours (4 is skin is sensitive) or at bedtime
