TRI VITA C30[®]

30% VITAMIN C SERUM

Industry-leading concentrations of vitamin C for optimal dermo-revitalization, free radical protection and skin restoration. **Prevents** the appearance of fine lines and wrinkles, loss of elasticity and uneven skin tone.

An innovative combination of 3 forms of vitamin C to reach several depths of the skin and release antioxidant benefits over time.

ACTIVE INGREDIENTS

15% L-Ascorbic acid

Provides optimal antioxidant action.

14.5% Ascorbyl silanol

Potent antioxidant, obtained by vectorizing L-Ascorbic acid using silanol technology, providing protection against the free radicals responsible for photoaging.

0.5% Ascorbyl ester

Combats the signs of photo aging, evens out complexion and boosts skin radiance.

Vitamin E ester

Ester form of vitamin E renowned for its antioxidant properties that helps to combat the free radicals responsible for photoaging (damage caused by the sun).

Ferulic acid ester

Renowned antioxidant that boosts and enhances the photoprotection action of the vitamins C & E.

EXPECTED BENEFITS

- **Skin looks younger and healthier**
- **Skin appears more radiant**

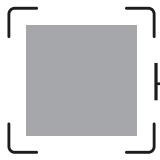

Clinically tested.

Homecare

MELA CREAM

PIGMENTATION CREAM

Mela Cream minimizes the appearance of pigment spots, harmonizes complexion and promotes an even skin tone.

For the appearance of pigment spots and melasma.

ACTIVE INGREDIENTS

Niacinamide

Lightening agent that inhibits the transfer of melanosomes. It is also known as vitamin B3 or vitamin PP and helps to decrease the appearance of skin redness.

Retinol

Anti-aging agent that boosts collagen production to combat signs of photoaging and improves the skin texture.

Salicylic & Mandelic acids

BHA and AHA that reduce intercorneocyte cohesion by destroying lipids that bind the outer cells of the epidermis with their keratolytic properties.

Phytic acid

Lightening and antioxidant AHA that has a synergic action to brighten the complexion when used with glycolic acid.

Licorice extract

Lightening agent that regulates the dispersion of melanin (agent responsible for pigment spots) to help homogenize complexion.

EXPECTED BENEFITS

■ **Appearance of pigment spots is reduced**

■ **Complexion is harmonized**

Clinically tested.
