

yllume

An answer to all your skin concerns

After a decade of research and development, Yllume has created the ideal skincare system for even, brighter skin by working together with leading laboratories in **Germany, UK, and Japan**. Yllume uses a world exclusive, patented proprietary ingredient called PhytoflORAL® consisting of colourless carotenoids for internal skin lightening and brightening.

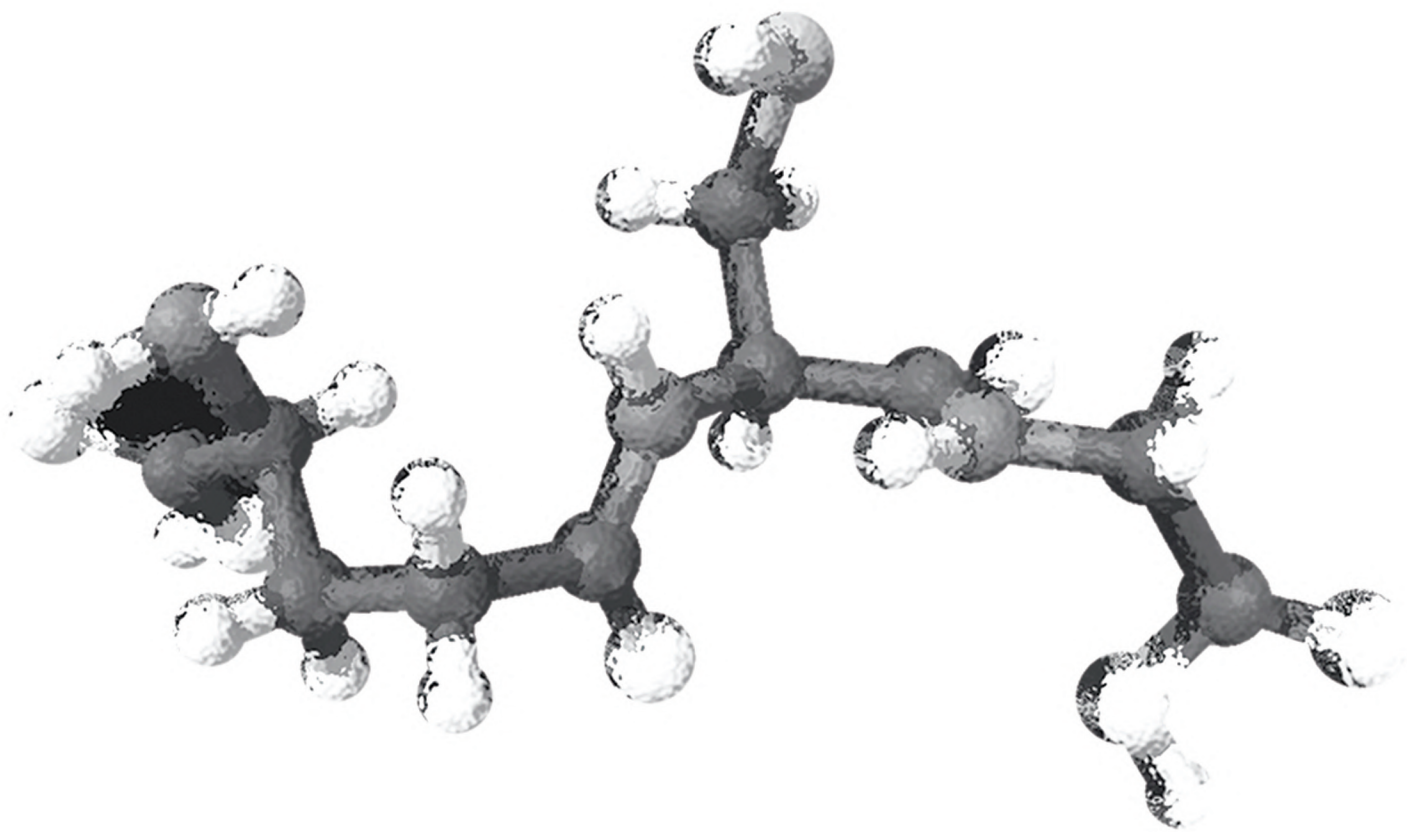

Colourless carotenoids are naturally found in the top-most layers of the skin at a level of 38%, those deficient in these carotenoids show signs of hyper-pigmentation, sensitivity, acne and dry skin.

Yllume is the only skincare system to contain these carotenoids and is able to address these issues via a unique approach, delivering unique lightening actives both topically and internally at a cellular level.

Yllume is clinically-proven to brighten, plump and even out skin tone and noticeably reduce hyper-pigmentation after only 28 days, giving skin a radiant, luminous, and youthful glow from top to toe without the use of common lightening and peeling agents.

Yllume revolutionised the trend on the use of Glutathione. Yllume is the safest, effective and proven answer to your skin lightening concerns. Yllume Ultimate Illuminating Complex™ Skin Supplement is a concoction of active whitening ingredients brought together in the most bio-available formula available on the market today comprising of Colourless Carotenoids; 90% Ellagic Acid from the rind of organic pomegranate, especially grown on the Yllume fields in Italy, N-Acetyl Cysteine, Vitamin C, BioPerine® for a whiter, clearer tone, and firmer skin from top to toe.

FACT

Many of the skincare and beauty products to date are using Glutathione as one of the key ingredients to lighten and brighten the skin.

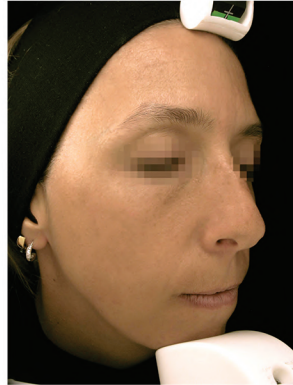

Significantly, Glutathione has the ability to lighten pigmented skin, including dark acne scars, freckles, dark underarms and age spots by altering the melanocytes' metabolic processes to turn dark pigmentation (eumelanin) into light pigmentation (pheomelanin).

However, Glutathione used as a supplement is ineffective as it breaks down in the stomach, making it useless for consumption.

Clinically Proven

Award Winning Brand

Ultimate Illuminating Complex Skin Supplement

Yllume laboratories has taken a revolutionary technology and created Ultimate Illuminating Complex™ Skin Supplement, turning many women's dream of beauty into reality.

Clinically proven for visibly a whiter, smoother, radiant skin in just 28 days. Yllume Ultimate Illuminating Complex™ Skin Supplements, not only helps you achieve a whiter, glowing skin by clearing any hyperpigmentation, acne marks, liverspots & sun spots, but also provides a boost in antioxidants (4000 ORAC points added to your daily diet), boosts collagen synthesis, increases body's own glutathione levels, and ensures your skin is protected against SPF from the inside out, by creating an invisible barrier against UV rays.

Key Benefits

For even, smoother, brighter, and glowing complexion

Boosts collagen

Restores the skin's texture

Provides 4000 ORAC points (Oxygen Radical Absorbance Capacity)

Replenishes skin's defenses

Increases body's Glutathione levels naturally

Defends and soothes skin against UV damage at cellular level

Hydrates and moisturizes skin

Prevents DNA damage

Protects and enhances the efficacy of other active ingredients and their activity

Anti-inflammatory

Reduces hyperpigmentation

Fights premature ageing

Free from: Preservatives, artificial colours, gelatin, gluten, salt, and yeast.

Ultimate Illuminating Complex Cream

Delivering safe, active ingredients deep into the skin, the Yllume Ultimate Illuminating Complex Cream targets the appearance of hyperpigmentation and helps reduce its appearance by lightening the skin, evening out skin tone and texture, and balancing the production of Melanin (the natural pigment found in our skin that controls its colour).

This rich cream will also help to hydrate the skin, keeping it smooth and nourished while calming any sun damage at a cellular level.

Key Benefits

For even, smoother, brighter, and glowing complexion

Fights premature ageing

Defends and soothes skin against UV damage at cellular level

Replenishes skin's defenses

Reduces hyperpigmentation

Restores the skin's texture

Ultimate Illuminating Complex Mask

Yllume Ultimate Illuminating Complex™ Mask uses an exclusive proprietary process in its creation so that high levels of actives are delivered safely to the skin, allowing skin brightening actives to be delivered to deeper layers of the skin cells.

It utilises cross polymer papaya extract, with new glow enhancing technology to polish the skin without the use of common chemical peeling agents such as glycolic and salicylic acid, which can be highly irritating even for normal skins. Instead, it softens skin and gently lifts away dry surface cells.

Key Benefits

For even, smoother, brighter, and glowing complexion

Fights premature ageing

Defends and soothes skin against UV damage at cellular level

Replenishes skin's defenses

Restores the skin's texture

Reduces hyperpigmentation

Ultimate Illuminating Complex Tonic Mist

The highly charged waters in this refreshing mist hydrate and rebalance even the duller of complexions. The mist creates a special mineral and marine ion-rich environment that instantly shifts the skin's energy levels, uplifting and reviving the look of lethargic skin.

In addition to being an excellent daily skin brightener, it also works well after exposure to sun, wind or other dehydrating conditions. Tonic Mist is also highly recommended for men after shaving. Spray under or over make-up as a daily skin refresher and brightener.

Key Benefits

For even, smoother, brighter, and glowing complexion

Fights premature ageing

Defends and soothes skin against UV damage at cellular level

Replenishes skin's defenses

Prevents DNA damage

Reduces hyperpigmentation

Ultimate Illuminating Complex Cleanser

A gentle, yet hard-working cleanser that combines Colourless Carotenoids with extracts to control and slow the activity of tyrosinase (the enzyme that stimulates melanin production) works directly on melanin content within the skin cells for an even, bright and glowing complexion.

It restores the skin's texture and tone by delicately polishing for a smoother and renewed complexion. It gently purifies deep-down, effectively removing make-up and impurities without drying the skin. Follow with Yllume Ultimate Illuminating Complex™ Tonic Mist to enhance effects.

Key Benefits

For even, smoother, brighter, and glowing complexion

Fights premature ageing

Defends and soothes skin against UV damage at cellular level

Replenishes skin's defenses

Prevents DNA damage

Reduces hyperpigmentation

Restores the skin's texture

Even.Brighter.Skin

“““

I jumped from one formulating chemist to another to ensure that I found one that understood the brands philosophy: ‘active ingredients at potent but safe levels that delivers results’ ... From the initial research and development to the final formulation, I went through numerous versions and stability tests. It wasn’t a simple task ... We had incredibly high levels of active ingredients such as growth factors and brightening agents together with high levels of natural plant and fruit ingredients which were ultimately turned into an active, safe, and clinically proven formula.

I am confident you will find that Yllume products deliver as promised.
