

ASSOCIATED WITH INJECTABLE BIOREVITALIZATION

ADVANTAGES

The synergistic effect gives a double dermal stimulation, with much better results than the two treatments performed separately (see chart). The oedema produced by PRX-T33 mitigates the pain of the subsequent injections and reduces the formation of ecchymoses. PRX-T33 provides deep and immediate hydration which tightens the skin. Additionally, it produces a mild peel effect which results in bright and radiant skin. The patient is immediately satisfied, even before the effect of the fibroblast stimulation, which takes approximately twenty days to become visible.

ASSOCIATED WITH MICRONEEDLING

INDICATIONS

Scars (acne, chicken pox, etc.) including on the back, indelible wrinkles, enlarged pores, post-inflammatory dermal atrophy (acne).

ASSOCIATED WITH PDO THREADS

ADVANTAGES

The oedema caused by PRX-T33 forms a cleavage plane with much less vascularization. Facilitates the subsequent thread penetration; it reduces pain and the risk of ecchymoses. Whereas the effect of threading is visible after a period of time, the result of the associated treatment is immediately evident because of the deep hydration induced by PRX-T33, resulting in immediate patient satisfaction. This associated treatment stimulates both type I and type III collagen production, thus giving a more natural effect compared to threading on its own. Moreover, this results in fewer threads being required in the following sessions. Apply PRX-T33 in linear wrinkles ('Necklace lines') with the specific spatula along the depression. Rub until the skin slightly rises so that the thread may be placed in a more superficial plane.

PROTOCOL FOR STRETCH MARKS

DEEP STRETCH MARKS (DEPRESSED OR EMPTY UPON PALPATION)

5-10 weekly sessions of PRX-T33 alone, applied with the specific spatula covered with a nitrile glove, 2-3 times along the lesion, as though to erase it, until it rises. Between sessions apply WiQo ELASTICIZING ANTI-DRYING BODY CREAM each day at home.

WHITE AND PEARLY STRETCH MARKS

5-10 weekly sessions of PRX-T33 alone, applied with the specific spatula covered with a nitrile glove, 2-3 times along the lesion, as though to erase it, until it rises. Between sessions apply WiQo ELASTICIZING ANTI-DRYING BODY CREAM each day at home.

ASSOCIATED WITH PLATELET RICH PLASMA (PRP) IN THE TREATMENT OF ALOPECIA

RATIONAL OF THE ASSOCIATION

It has been demonstrated that the number of activated fibroblast receptors and their affinity increase significantly when they come into contact with platelet growth factors twice at 8 hours' interval. Clinical experience has shown an enhanced response to the treatment even after a non-specific stimulation. This stimulation may be given with the non-invasive application of PRX-T33, 8 hours before the PRP procedure. A clinical trial on 35 patients has shown a lower number of non-responder patients and enhanced results among those pre-treated with PRX-T33 compared to those that were not pre-treated.

COMBINED WITH ABLATIVE RADIOFREQUENCY

ADVANTAGES

Chemical (PRX-T33) and physical stimulations (RF) act on different levels of both the skin and dermis, creating a synergy, which amplifies the therapeutic response and the final aesthetic results.

COMBINED WITH NON-ABLATIVE FRACTIONAL RF

ADVANTAGES

Chemical (PRX-T33) and physical stimulations (RF) act on different levels of both the skin and dermis, creating a synergy, which amplifies the therapeutic response and the final aesthetic results.

COMBINED WITH NON-ABLATIVE FRACTIONAL LASER

ADVANTAGES

Chemical (PRX-T33) and physical stimulation (laser) act on the dermal matrix in different ways, yet have a synergic effect and therefore maximize the therapeutic results

COMBINED WITH MESOTHERAPY FOR ALOPECIA

ADVANTAGES

Biostimulation with PRX-T33 improves mesotherapy's bioavailability, PRX-T33 stimulates the skin chemically, leading to a synergistic effect with far superior results than the two treatments performed separately. Additionally, PRX-T33 hydrates the skin and the edema it induces reduces injection pain.

NO-NEEDLE BIOREVITALISATION

ADVANTAGES

• Painless, no needles • Effective, natural result • No downtime • Can be used during the summer months • Each treatment lasts only 10-15 minutes • Provides immediate palpable turgor.
