# ACTIVE PEEL SYSTEM

AGE-DEFYING | EXFOLIATING | REJUVENATING

INNOVATIVE SKINCARE

## ACTIVE PEEL SYSTEM

### SUMMARY

The clinically advanced botanically based Active Peel System is a powerful yet gentle, fast-acting two-step treatment designed to resurface and polish the skin while providing hydration, rejuvenation, and antioxidant protection. Designed to use every other day, this complete skin treatment produces a cool tingling sensation upon application as it activates. This well-balanced system helps to improve the appearance of skin tone and texture, resulting in a smooth, hydrated, and more youthful-looking complexion.

Step 1 is designed to provide controlled exfoliation, featuring a proprietary combination of powerful yet gentle botanical acids combined with soothing, nurturing botanical extracts.

Step 2 provides hydration and rejuvenation, featuring our proprietary botanical extremozyme technology and Copper Tripeptide-1 combined with soothing active botanicals.

### APPLICATION

Recommended for use every other day, preferably in the evening.

After cleansing, apply Step 1 over entire face and neck; leave on for three minutes (do not rinse), then apply Step 2 over same area, and leave on.

Note: The Active Peel System Step 1 and Step 2 application will produce a cool tingling sensation; this is normal.

### BEFORE & AFTER

Improvements in sagging, fine lines and wrinkles, expression lines, luminosity, smoothness, texture, and sallowness.

**60 Year Old | Native American | Female**
